Kumasi, Ghana.

PROFILE / SUMMARY

Creative, technology-driven, and detail-oriented professional with experience in graphic design and a growing skill set in WordPress development, AI-assisted software and system development, and database management. Proficient in Adobe Photoshop, Adobe Illustrator, and Microsoft Office applications, with practical knowledge of WordPress website development and the use of AI-powered tools to support software development and problem-solving. Certified in MySQL and System Analysis and Design, with an academic background in Information Technology Education. Passionate about leveraging creativity and emerging technologies to develop effective digital solutions for individuals and businesses. Aspiring to expand into computer networking and broader IT infrastructure, with a long-term goal of building expertise across software development, web technologies, networking, and other IT solutions.

EDUCATION

- ❖ University of Skills Training and Entrepreneurial Development – B.Sc. Information Technology Education (2024 – Present).
- ❖ Adu Gyamfi Senior High School – General Arts (2020 – 2023).

CERTIFICATIONS

- ❖ Introduction to SQL and SQL Intermediate – Sololearn.
- ❖ Systems Analysis Design – Mind Luster.
- ❖ West African Senior School Certificate Examination (WASSCE) – WAEC.
- ❖ Certificate of Completion, Adu Gyamfi Senior High School.

SKILLS

- ❖ Graphic Design (Adobe Photoshop and Illustrator) – Logo & Brand Identity, Social Media Design, Flyers, Posters and Print Media, Label and Packaging Design, Video Thumbnail Design, Photo Manipulation and more.
- ❖ Website Design and Development - I design and develop professional, responsive websites tailored to clients' needs, including portfolio websites, business websites, school and church websites, e-commerce platforms, and more.
- ❖ Custom Application and System Development – Developing tailored, AI-assisted software applications and business management systems, including sales and inventory management systems, customer record management, expense tracking, reporting dashboards, and other workflow automation solutions. I leverage modern AI-powered development tools to build practical, user-friendly systems that help businesses and individuals manage operations, monitor performance, reduce manual work, and make informed decisions.
- ❖ System Planning and Engineering – Analyzing project requirements, defining system features, selecting appropriate software architecture and development technologies, and establishing a structured development workflow. I prioritize feature-by-feature implementation, continuous testing, and validation to ensure systems are functional, reliable, maintainable, and aligned with user requirements.

EXPERIENCE

- ❖ **Graphic Designer | Eugene Creatives 2022 – Present**
 - Designed and develop logos, flyers, posters, social media content.
 - Created professional label designs tailored to client needs.
 - Successfully managed multiple projects, delivering within deadlines while ensuring high quality.

- Built and maintained relationships with clients, leading to repeat business and referrals.

❖ **Social Media Management | HiSkul Talent TV**

I was given an appointment to work with HiSkul Talent TV in 2024, where I played the role of a social media manager. For the period that I worked with HiSkul Talent TV, I created interactive and educational contents across social media platforms which aligns with goals of HiSkul Talent TV and also, contributed to growth of the social media handles while maintaining a high level of integrity and professionalism.
